Truss Bridges

CTS have extensive experience in the design, manufacture and installation of Truss footbridges.

We have designed and fabricated Vierendeel steel trusses in a variety of locations and in lengths ranging from 5m upwards.

This type of truss provides a cleaner elevation that lends itself to having various design options such as timber infills on the parapet or having the parapet as a completely separate item with arched top booms as shown on some of the photographs.

Images (top to bottom) :-

34m x 2.5m Bow string truss with steel abutments at Browning Street, Birmingham – Client Shimizu Europe —Ref 1788
